

# ONNX Pre-processing WG

Monthly meeting - June 8, 2022

# Agenda

- Progress on open issues/PRs
- Community meetup
- Naming choice for models that include preprocessing
- Open floor

# Status - Open issues/PRs

## PRs:

Add Batch processing with SequenceMap tutorial  
<https://github.com/onnx/tutorials/pull/265>

[In progress] Add Data preprocessing with ONNX: ResNet-50 example  
<https://github.com/onnx/tutorials/pull/266>

Add Resize-17: Antialias filter, axes, and keep\_aspect\_ratio\_policy  
<https://github.com/onnx/onnx/pull/4126>

Introduce ai.onnx.image.CenterCropPad  
<https://github.com/onnx/onnx/pull/4190>

## Issues:

### ONNX runtime function inlining:

FunctionImpl should consider nested subgraphs when updating graph inputs/outputs  
<https://github.com/microsoft/onnxruntime/issues/10876>

Local functions with subgraphs: GraphProto attribute inferencing error  
<https://github.com/microsoft/onnxruntime/issues/10698>

### Sequence support:

Can't constant fold SequenceEmpty node  
<https://github.com/microsoft/onnxruntime/issues/11041>

Sequence initializers  
<https://github.com/onnx/onnx/issues/4105>

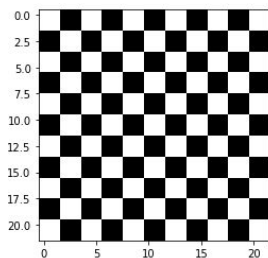

## Models:

ResNet-50 network has hardcoded batch-size 1  
<https://github.com/onnx/models/issues/509>

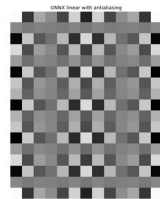

# Resize-17 - Antialias, axes, and keep\_aspect\_ratio\_policy

- antialias
  - Applies antialiasing when downscaling for linear and cubic modes
- axes
  - Allows selecting a subset of axes to resize, while keeping the rest unchanged  
HWC -> (0, 1)  
CHW -> (1, 2)
- keep\_aspect\_ratio\_policy
  - Values:
    - "stretch" (default)
    - "not\_larger" - (100, 50)  
(200, 200) -> (200, 100)
    - "not\_smaller" - (100, 50)  
(200, 200) -> (400, 200)

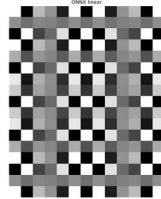

<https://github.com/onnx/onnx/pull/4126>

Resize(..., antialias=1)

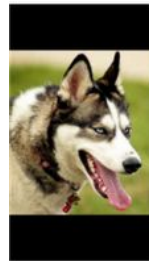

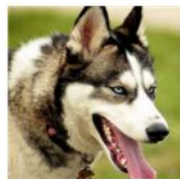

Resize(..., antialias=0)

From [22, 22, 3] to [17, 13, 3]

# Introduce `ai.onnx.image.CenterCropPad`

- New domain **`ai.onnx.image`**
- Implemented in terms of `Slice` and `Pad`
- Typically used in image data pipelines

<https://github.com/onnx/onnx/pull/4190>

# Community meetup

- ONNX Community Day 6/24/22
- 2-4 minute update from SIG/WG leaders
- Joaquin can't attend, will pre-record a short presentation

# Naming choice for models that include preprocessing

- Brought up in Slack (#onnx-preprocessing)
- Do we have a preferred term for models that include data preprocessing? Some ideas:
  - Augmented model
  - Pipeline model
  - End-to-end model
  - Raw input model
  - Leave it as "models that include preprocessing"

Open floor
